

WE DELIVER MANAGED SERVICES TAILORED TO YOUR NEEDS.

SERVICE TYPE

MANAGED AND CONTRACTUAL

CFS is well-versed in a wide range of hardware, operating systems, technologies and workload configurations. Pulling from a team with over 20 years of workload experience, **we bring our broad expertise to the table.**

- We work with both Distributed and Mainframe systems
- We have the ability to support any custom model
- We have experience with many diverse customers and verticals
- We have a proven track record of getting the job done right

OUR DELIVERY MODEL

We can cater to your specific requirements, and design tailored solutions that work best for your delivery model, and the way you do business. Our primary goal is to ensure that all of your automation needs are met, empowering you to focus on growing your business. We can take care of any of your needs, including:

Supporting and monitoring batch processes remotely

Keeping your environment up to date

Managing your licensing for you

Designing and implementing architectural modifications

CFS Consulting has experience in a multitude of industries,

including, Banking, Finance and Insurance, Government and Public Sector, Retail and Wholesale, Services Sector but not limited to.

CFS supports a number of clients on an ongoing basis, and helps them leverage their Digital Business Automation tools.

Supported Environments

CFS Consulting can take care of any of your technical environments, and can help you with your schedule promotion process. We have years of experience providing best practice assistance in transporting batch workflows from one environment to another. One tool we use to accomplish this is the BMC Control-M Workload Change Manager, offering you the ability to manage promoted batch workflows from one environment to the next.

- DEV, TEST, INT, UAT, QA
- PRE-PROD, MODEL
- Production
- Disaster Recovery
- High Availability Setups

CFS is not only there to help manage your DBA installation, but to partner with you on your existing processes, such as service reviews, vendor feedback, incident escalation and root cause analysis. We can help evaluate new vendor offerings and collaborate with you in R&D. We can provide you with invaluable version and patch road mapping, and design support for your high availability needs,

**GIVEN OUR EXTENSIVE
EXPERIENCE IN
CONSOLIDATIONS,
IMPLEMENTATIONS,
AND SPLITS.**

"The biggest advantage of Control-M for us is the ability to look at our entire environment through a single pane of glass and to see all the successes and threats out there. Automation and integration with BMC Remedy are also important. Automation lets us get the job done despite condensed staffing. Everyone is using the same tool, so training is easier. Those factors have contributed to dramatic efficiency gains across IT, and we see vast potential for more gains in the future."

Derek Masseth,
Sr Director of Infrastructure
Services
University of Arizona

RESOURCES, OPERATIONS AND SERVICES
