

# CONTROL-M ADMIN TRAINING

CLASS DURATION	5 Days
PRICE	Per Student
FIND OUT MORE	Call 1.800.513.2957

This five-day class builds on our introductory training and is designed to provide Control-M schedulers with the Administrator skills needed manage a Control-M environment.

The Control-M Administrator training class content encompasses the architecture, design, and configuration of Control-M and all its components. Intended for system administrators, this course highlights the hardware and software requirements of the system, how it communicates over networks, its database structure, and other aspects of the products.

The class explores the tools available for administering the Control-M environment, Interactive Labs and hands-on exercises are woven into the learning experience to enhance and reinforce key learning areas of administration. Although working in a demo environment will provide the skills needed to administer any BMC Control-M environment for optimum learning outcomes we recommend using the client's existing infrastructure for this class.

## CONTROL-M ADMINISTRATOR TRAINING CLASS OUTLINE

### MODULE 1 Overview:

- Control-M Architecture
- Control-M Enterprise Manager/Server Components
- Control-M Installation Requirements
- Control-M user and group definitions

### MODULE 3 Automated Workflow:

- NewDay Processing
- Defining and Running Jobs

### MODULE 2 Connecting Components and Setup:

- Set up Communication
- Install and Configure Agents
- Define Control-M/EM Users
- Monitor the Environment

### MODULE 4 Monitoring & Management:

- Managing the Environment from the OS
- Managing the Environment from the CCM
- System Processes and Logs
- Auditing and Reporting

#### MODULE 5 Application Plugins and Remote Hosts:

- Remote Hosts
- Application Plug-Ins

#### MODULE 6 Enterprise Manager Add-Ons:

- Add-Ons Overview
- Control-M Forecast
- Control-M SLA Management
- Control-M Web

#### MODULE 7 Security & Auditing:

- Auditing and Annotation
- Control-M/EM Security
- LDAP and Active Directory Authentication
- IdP Authentication
- Control-M/Server and Control-M/Agent Security
- Set Administrator Passwords

#### MODULE 8 Feature Management:

- Integrating with Remedy/Other Systems
- Job Version History Management Support
- Database Maintenance and Database Utilities
- Failover and High Availability
- Job Flow Control and Managing Nodes

#### MODULE 9 Troubleshooting:

- BMC Website
- Documentation
- Troubleshooting Control-M

#### MODULE 10 Application Integrator, API and Job as Code:

- Application Integrator
- Automation API
